

## RUBBISH BIN SMILE

Rubbish bins do not have to look passive and repulsive  
– our SMILE rubbish bins always look happy, regardless of the rubbish inside them.

The own product range of OÜ Weldmet Solution consists of furniture for public spaces. This includes ashtrays and rubbish bins, sorting bins, benches, tables and bicycle holders for indoor and outdoor use.

Our products are durable, modern and fit well with the surroundings; in addition to looking nice, they are also customer-friendly and easily maintained.

In cooperation with our customers, we are constantly creating new products and improving the existing ones. We believe that the best feedback can only come from users.

Our primary customers are homeowners, apartment associations, companies, cities and rural municipalities.

### SMILE 30, 40 and 60 L

SMILE rubbish bins are cheerful-looking, strong and durable. These smiling rubbish bins can be mounted on the walls of buildings or set up in parks and recreational areas.

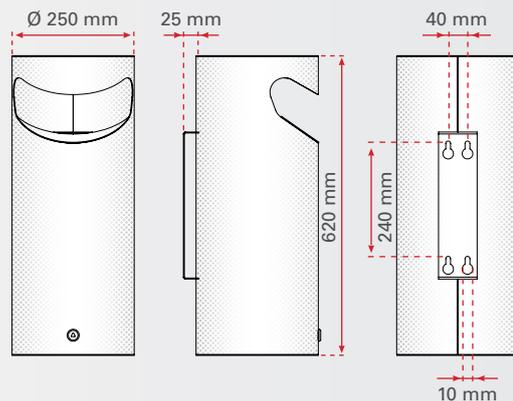

SMILE rubbish bins are available in stainless steel, carbon steel and with a painted finish. The surface of the stainless steel model has been polished and the standard shade of the painted model is grey RAL 7046. For custom orders, all RAL shades are available. Ask us for more information.

SMILE rubbish bins can be mounted on walls or fixed on a specific base. If for any reason the standard fittings, colour or base do not suit your needs, it is possible to order custom fittings and colours according to your wishes. If necessary, we will also provide materials for mounting the bin.

For maintenance, hinges and lock should be greased once or twice a year. All SMILE rubbish bins can be fitted with SLOPE ashtrays (DUO model).
