

ASHTRAY SQUARE

SQUARE ashtrays are suitable for locations which require greater capacity and durability

The own product range of OÜ Weldmet Solution consists of furniture for public spaces. This includes ashtrays and rubbish bins, sorting bins, benches, tables and bicycle holders for indoor and outdoor use.

Our products are durable, modern and fit well with the surroundings; in addition to looking nice, they are also customer-friendly and easily maintained.

In cooperation with our customers, we are constantly creating new products and improving the existing ones. We believe that the best feedback can only come from users.

Our primary customers are homeowners, apartment associations, companies, cities and rural municipalities.

SQUARE L and XL

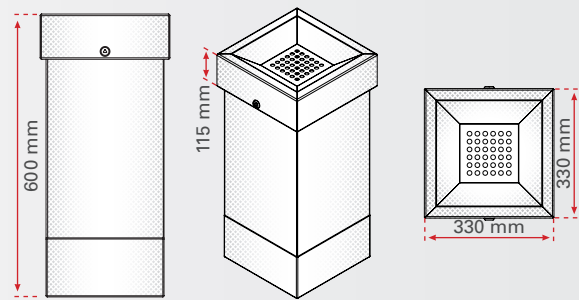

SQUARE ashtrays are made of stainless steel AISI 304 or common steel. The surface of the stainless steel model is brushed with GRID 240. The lower part of the painted model is black RAL 9005 and its upper part has a stainless steel finish.

A timeless and trendy look. These ashtrays are suitable for crowded places and centres. Their material and finish guarantee durability and easy maintenance. SQUARE ashtrays come with a concrete base, which makes it stable and keeps it in its place.

Recommended maintenance includes greasing the hinges and lock once or twice a year. SQUARE ashtrays come in two different sizes – L and XL.
