

XBENCH BENCHES FOR THE PUBLIC SPACE

Simple and stylish. Strong and comfortable construction.
The X product series of street furniture.

The own product range of OÜ Weldmet Solution consists of furniture for public spaces. This includes ashtrays and rubbish bins, sorting bins, benches, tables and bicycle holders for indoor and outdoor use.

Our products are durable, modern and fit well with the surroundings; in addition to looking nice, they are also customer-friendly and easily maintained.

In cooperation with our customers, we are constantly creating new products and improving the existing ones. We believe that the best feedback can only come from users.

Our primary customers are homeowners, apartment associations, companies, cities and rural municipalities.

NEW CANAPE AND NEW STOOL

Our bench Xbench has been designed and manufactured in such a way that it meets the durability requirements set for city furniture, while its design shows that modern trends have also not been forgotten. These benches are suitable for use in both outdoor and indoor premises as well as next to footpaths and park trails.

"As a designer, I have given a kind of professional pledge – I design products that I would be happy to use myself. I believe that the X-series meets all these requirements."

- Tarmo Luisk, designer

The frames of Xbench benches are made of painted metal. The seat and the backrest are available in laminated timber; upon special orders, also in heat-treated wood or recyclable plastic. The range of colours is diverse, depending on the material.

It is recommended to perform maintenance on the wooden surface once a year with a pigmented wood protection product, whereas the products made of recyclable plastic require practically no maintenance.
